**We offer our expert advice** through two distinct contractual services that assist you to establish your own medium to long term forestry investment on your own land.

The services are aimed for you to generate an income from your underutilised previously cleared lands, including abandoned sugarcane land, and for you to secure an income for your retirement and for your children's future. It is a revenue secure investment as we offer the option to purchase your matured trees at market value.

### **Contract plantation management**

This is a complete service to enable you to establish your own forestry plantation on your own land. Our experts will offer regular forestry advice which will offer an improved likelihood of a profitable harvest as you contract us to carry out the regular maintenance of your plantation.

#### **The service includes**

- Advice on suitable tree species to suit your specific land; site assessment, soil analysis.
- Boundary survey mapping, line survey & demarcation.
- Pre-planting line cutting and spot weeding.
- Supply tree seedlings of Teak, Mahogany, Sandalwood, Vesi and other mainly indigenous trees species.
- Carry out the contract planting and tree maintenance services, known as silvicultural management, that includes weed control, pruning and thinning.
- Advice on how to successfully establish and maintain the growth and health of your trees.
- Advice on accessibility; roads for harvesting (road grading).
- Prepare inventory, road grading, logging and harvesting plans for the plantation, woodlots and natural forests.
- Advice on the likely returns on investment.
- Advice on fire and cyclone risk assessment and mitigation strategies.
- Advice on workplace health & safety.

### **Contract planting**

This is a basic contract to plant suitable trees on your own land.

#### **The service includes**

- Advice on suitable tree species to suit your specific land; site assessment, soil analysis.
- Supply tree seedlings of Teak, Mahogany, Sandalwood, Vesi and other mainly indigenous trees species.
- Carry out the contract planting that includes site preparation and the initial weed control.
- Advice on how to successfully establish and maintain the growth and health of your trees.

**Contact Future Forests (Fiji) Ltd to arrange a site visit and to obtain a quote.**

*Gain pride producing a renewable and sustainable natural resource that may be made into high value wood products and, at the same time you will assist in improving the soil, water, air and the natural habitat for your flora and fauna, as well as for Fiji.*
